NOTICE: Water Instructions For Your New Tree.

Please be aware that your new tree needs to be watered daily for the next 4 to 6 weeks. Approximately 5 gallons of water should be applied daily weather permitting.

Watering should be done slowly. The slower the water is applied the less run off will occur. This will allow the water to penetrate the soil / mulch and get to the roots.

Do not water during the midday. Avoiding the direct sun of late morning until early evening will reduce the amount of water lost to quick evaporation.

Please retain this sheet for your records.
